This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1. (Original) The salt of a sulfonic acid with clopidogrel at least part of which is present in crystalline form.
- 2. (Original) The salt of a sulfonic acid with clopidogrel which is preparable by precipitating the salt from a clopidogrel solution, the solvent comprising a hydrocarbon and/or an ether.
- 3. (Original) The salt according to claim 2 wherein the solvent comprises toluene, dioxane, methyl-tert-butyl ether and/or diethyl ether.
- 4. (Currently Amended) The salt according to claim 2 or 3 at least part of which is present in crystalline form.
- 5. (Currently Amended) The salt according to any of the previous claims Claim 1 wherein the sulfonic acid is selected from the group consisting of methane sulfonic acid, ethane sulfonic acid, benzene sulfonic acid, toluene sulfonic acid and naphthalene sulfonic acid.
- 6. (Currently Amended) The salt according to any of the previous claims Claim 1 which contains solvent molecules.
- 7. (Original) The salt according to claim 5 wherein the solvent is selected from toluene and dioxane.
- 8. (Original) The salt according to claim 7 which is clopidogrel besylate, is present in crystalline form and contains toluene, the 10 most intensive peaks of the X-ray powder spectrum of this salt having the following 2θ values

| Relative intensity | | 2θ |
|--------------------|---|-------|
| 99.11 | • | 10.78 |
| 100.00 | | 12.08 |
| 96.77 | | 16.09 |

| 62.57 | 16.66 |
|-------|-------|
| 84.58 | 20.22 |
| 93.53 | 21.50 |
| 66.00 | 22.56 |
| 78.33 | 22.91 |
| 81.82 | 23.45 |
| 56.15 | 24.92 |

- 9. (Original) The salt according to claim 8 which has the X-ray powder spectrum shown in Fig. 1.
- 10. (Original) The salt according to claim 7 which is clopidogrel besylate, is present in crystalline form and contains dioxane, the 10 most intensive peaks of the X-ray powder spectrum of this salt having the following 2θ values

| Relative intensity | 2θ |
|--------------------|-------|
| 51.66 | 10.78 |
| 54.15 | 10.87 |
| 90.13 | 12.13 |
| 50.83 | 14.34 |
| 50.27 | 16.43 |
| 76.03 | 21.57 |
| 81.19 | 22.87 |
| 100.00 | 23.06 |
| 54.18 | 23.72 |
| 54.05 | 25.17 |
| | |

- 11. (Original) The salt according to claim 10 which has the X-ray powder spectrum shown in Fig. 2.
- 12. (Original) The salt according to claim 5 which is clopidogrel tosylate, the 10 most intensive peaks of the X-ray powder spectrum of this salt having the following 2θ values

| Relative intensity | 2θ |
|--------------------|-------|
| 80.54 | 13.13 |
| 83.15 | 13.28 |

| 67.75 | 17.28 |
|--------|-------|
| 70.05 | 17.64 |
| 73.78 | 18.96 |
| 84.65 | 19.21 |
| 100.00 | 19.48 |
| 75.95 | 19.87 |
| 71.09 | 20.12 |
| 86.48 | 25.06 |

- 13. (Original) The salt according to claim 12 which has the X-ray powder spectrum shown in Fig. 3.
- 14. (Currently Amended) A method for preparing a salt according to any of the claims 1 to 13 Claim 1 wherein the salt is precipitated from a solution of the clopidogrel and the solvent comprising a hydrocarbon and/or an ether.
- 15. (Original) A method according to claim 14 wherein the solvent comprises toluene, dioxane, methyl-tert-butyl ether and/or diethyl ether.
- 16. (Original) A method for purifying clopidogrel wherein contaminated clopidogrel or a salt thereof, optionally after release of the clopidogrel base, is converted into the salt of a sulfonic acid with clopidogrel and, if desired, the clopidogrel base is then released from the isolated salt of the sulfonic acid and/or converted into another salt.
- 17. (Currently Amended) The use of a salt according to any of the claims 1 to 13 Claim 1 for preparing a pharmaceutical formulation.
- 18. (Currently Amended) A pharmaceutical formulation comprising a salt according to any of the claims 1 to 13 Claim 1.
- 19. (Original) Active ingredient particles comprising a solid adsorbent and clopidogrel or a pharmaceutically acceptable salt thereof adsorbed thereon.
- 20. (Original) Active ingredient particles according to claim 19 wherein the salt is selected from the group consisting of hydrogen sulfate, hydrochloride, mesylate, besylate and tosylate and napsylate.

- 21. (Currently Amended) Active ingredient particles according to claim 19 or 20 wherein the adsorbent is Lactopress.
- 22. (Currently Amended) The use of active ingredient particles according to claim 19, 20 or 21 for preparing a pharmaceutical formulation.
- 23. (Currently Amended) A pharmaceutical formulation comprising active ingredient particles according to claim 19, 20 or 21.
- 24. (Currently Amended) A method for preparing active ingredient particles as defined in claim 19, 20 or 21, comprising the recovery of the active ingredient particles from a solvent in which the adsorbent is insoluble or poorly soluble and the clopidogrel or the salt thereof is soluble.
- 25. (Original) A method according to claim 24 comprising suspending the adsorbent in the solvent, dissolving the clopidogrel or the salt thereof in the solvent and recovering the active ingredient particles.
- 26. (Currently Amended) A method according to claim 24 or 25 wherein the active ingredient particles are recovered by evaporation of the solvent.
- 27. (Currently Amended) A method according to any of the claims 24 to 26 Claim 24 wherein the clopidogrel and an acid are mixed with the suspension of the adsorbent.
- 28. (Original) A method according to claim 24 wherein the last stage of the synthesis of clopidogrel or a pharmaceutically acceptable salt thereof is carried out in the presence of the adsorbent.
